

Call for submissions:

OZSW 2014 Research Master Poster Session Radboud University Nijmegen, Friday November 7

* Open to all Dutch Research Master students *

If you would like to participate in the ReMA poster session, please send an email to 2014conference@ozsw.nl containing:

- the title of your presentation
- your name
- your institutional affiliation.

This information will be included in the conference program. The **deadline for signing up for a poster presentation is August 21st** (but please sign up as soon as possible). Note that everyone interested will be admitted to the session, there will be no review of poster proposals. Also note that presenters are required to register for the conference before September 15th.

To briefly explain the concept of a poster presentation, you prepare for it by summarizing and visualizing an argument on a poster of A0 or A1 format, using text, lay-out and/or pictures. During the session itself, all posters will be mounted in the same conference room, allowing the conference participants to walk by the different posters and ask questions to the presenters. This means that you will stand next to your poster during the session and have to be prepared to give further explanations.

In September we will provide more information about e.g. the exact size of the posters. For now we advise you to base your poster on a recent or soon to be written paper and have a look at these guidelines (though keep in mind that there is not one correct format for a poster presentation and that not all tips apply to philosophy posters):
